MCGRaw-Hill education's Nursing Spanish VISual Phrasebook
Neil Bobenhouse, Dean Meenach

Communicate immediately with Spanish-speaking patientssimply by turning the page

As a nurse, you need to be prepared for anything. But what if that anything is a language barrier with your Spanish-speaking patients? McGraw-Hill's Nursing Spanish Visual Phrasebook helps you overcome this difficulty and understand your patients' needs. With no experience in the language, you can find out the due date of an expectant mother; review a young child's medical history; let an elderly man know you are starting an IV; and reassure a worried parent that an interpreter is on the way.

McGraw-Hill's Nursing Spanish Visual Phrasebook works in three easy steps:

1. Point to each question.
2. Patient responds with a simple head nod, with a "yes" or "no" answer, or by pointing to a diagram.
3. Continue using the phrasebook to assist with patient assessment.

Just point and flip, and you can close the communication gap between you and your Spanish-speaking patients.

"The design and tactical battles that led to the most exciting America's Cup in history are laid out in meticulous detail in Winging It: Oracle Team USA's Incredible Comeback to Defend The America's Cup. Written by three veteran sailing journalists, Winging It provides an insider's look at the professional sailing business and the America's Cup, from how the 72-foot cats became the boat of choice - one early requirement: They had to be able to be disassembled and transported in standard shipping containers - to the design modifications Oracle made in the later stages of the series to bounce back from an 8:1 deficit and retain the Cup (not much besides some minor tinkering with the rudder)."

**THE ART OF SEAMANSHIP**  
Ralph Naranjo

Wind, waves, weather, and water demand the practiced art of seamanship

"Planning and reacting to the unanticipated are the flip sides of seamanship. This blending of pre-voyage preparedness with effective on-the-water response is learned rather than inherent--together they define the art of seamanship." -- Author RALPH NARANJO

Each time a sailboat casts off its docklines the sailor enters a marine realm that demands knowledge, preparedness, vigilance, and coolheadedness--these qualities are the foundation of good seamanship. Both an art as well as a science, seamanship is also the mastery of numerous practical details, from the best choice of line for a jib sheet to an accurate assessment of the passage of a deep low-pressure system.

Around-the-world sailor Ralph Naranjo--technical expert, ocean racer, former Vanderstar Chair at the U.S. Naval Academy--delivers a priceless reference for anything that comes up while on the water, sharing all the knowledge today's sailors need to "hand, ...

--The Wall Street Journal

"Crossing the Atlantic under sail, alone, is a nexus of sorts for all sailors, a dream and an adventure that seems obtainable within the framework of life and work, and it's in this context that Sea Trials provides inspiration to all of us. Bourke's route across the ocean, as a participant in the 2009 OSTAR, is circuitous at best as he battles headwinds and mechanical snafus, but he keeps it in perspective and never loses his sense of humor and awe. Sure he wants to do well in the race, but getting to the starting line is already a victory, and finishing, when others would have retired, seems in character. Bourke deftly weaves his life story into the narrative, from the tragic death of his wife that leaves him an angry single parent, to postponing his dreams until his kids are settled, to his rather bumbling attempts to become a sailor. It takes a good writer to make this work within the framework of a v...

JACK TAR AND THE BABOON WATCH
Frank Lanier

Was the Titanic doomed because of its name? Can you really "swallow the anchor"?

Jack Tar and the Baboon Watch is a collection of unusual, nautical-based phrases and trivia tidbits for Jack Tars* and landlubbers** alike. Author and mariner Frank Lanier began to compile these entries while serving in the Coast Guard; they were included in the Plan of the Day published aboard the various ships Lanier was stationed on starting in the 1980s. He explains these colorful terms and entertaining phrases in plain language and presents their origins-many of which will surprise you! Inside you will find words and phrases . . .

FROM THE FAMILIAR . . .

Over a Barrel--Sailors were sometimes tied over a barrel while being flogged. Rummage--A ship's cargo or the packing of it in the vessel's hold, the yard-sale-type association of the term arising from the fact damaged cargo was often sold at a "rummage sale," a clearing out sale of unclaimed goods at the dock. Rubbernecker--A sailor who stood by and look...

Everybody has the dream: Build a boat in the backyard and sail off to join the happy campers of Pogo Pogo, right? But how? Assuming you aren't independently wealthy, if you want a boat that is really you, you gotta build it yourself. With irreverent wit and an engaging style, George Buehler shows you how to turn your backyard into a boatyard. Buehler draws his inspiration from centuries of workboat construction, where semiskilled fishermen built rugged, economical boats from everyday materials in their own backyards, and went to sea in them in all kinds of weather.

Buehler's boats sail on every ocean and perform every task, from long-term liveaboards in Norwegian fjords to a traveling doctor's office in Alaska. The book contain...

SINGLEHANDED SAILING
Andrew Evans

"It takes thousands of hours of sailing to get the kind of knowledge contained in this book." -- from the Foreword by Bruce Schwab

The ONLY bible for how to sail your boat fast, safe, and alone

Solo sailing is within any sailor's grasp with a little forethought--and this essential guide.

Got a 35-foot sailboat? No problem. Is the wind blowing 20 knots? No problem. Are you racing offshore overnight? Even better. Singlehander Andrew Evans learned the hard way how to sail and race alone--with lots of mishaps, including broaches and a near tumbling over a waterfall--and in Singlehanded Sailing he shares the techniques, tips, and tactics he has developed to make his solo sailing adventures safe and enriching.

Learn everything you need to know to meet any solo challenge, including:

- Managing the power consumption aboard a boat to feed the electric autopilot
- Setting and gybing a spinnaker
- Finding time to sleep
- Dealing with heavy weather

Andrew Evans has gone singlehanded sailing more than eight hundred times over the past ten years for a total of 3,500 hours of singlehanded sailing -a reasonable start. He has never had a bad day on the water. Evans is a lawyer, Chartered Financial Analyst, and president of a small company in the solar power industry.
Expert advice on how to find (and purchase and outfit) that safe, affordable, and responsive sailboat to take readers around the world, or around the bay.

The first steps introduce you to the fundamentals of chemistry, allowing you to identify common mistakes almost immediately. Gradually, a series of interconnected steps takes you from simple to more challenging concepts at your own pace, with a variety of increasingly difficult exercises to practice what you've learned. As a medical professional, you need to be prepared for anything. But what if that anything is a language barrier with your Spanish-speaking patients? *McGraw-Hill's Medical Spanish Visual Phrasebook* helps you overcome this difficulty and understand your patients’ needs. With no experience in the language, you can locate an accident victim’s injury; find out how long a pregnant woman has been in labor; let an elderly man know you are starting an IV; and reassure a worried parent that an interpreter is on the way.

*McGraw-Hill's Medical Spanish Visual Phrasebook* works in three easy steps:

1. Point to each question.
2. Patient responds with a simple head nod, with a "yes" or "no" answer, or by pointing to a diagram.
3. Continue using the phrasebook to assist with patient assessment.

Just point and flip, and you can close the communication gap between you and your Spanish-speaking patients.
